

THE SMART ANTICORROSION TECHNOLOGY

**Rustech International “Smart” Anticorrosion Technology** is proud to introduce its NEW PROTECTION MODULES:

Fully Digital

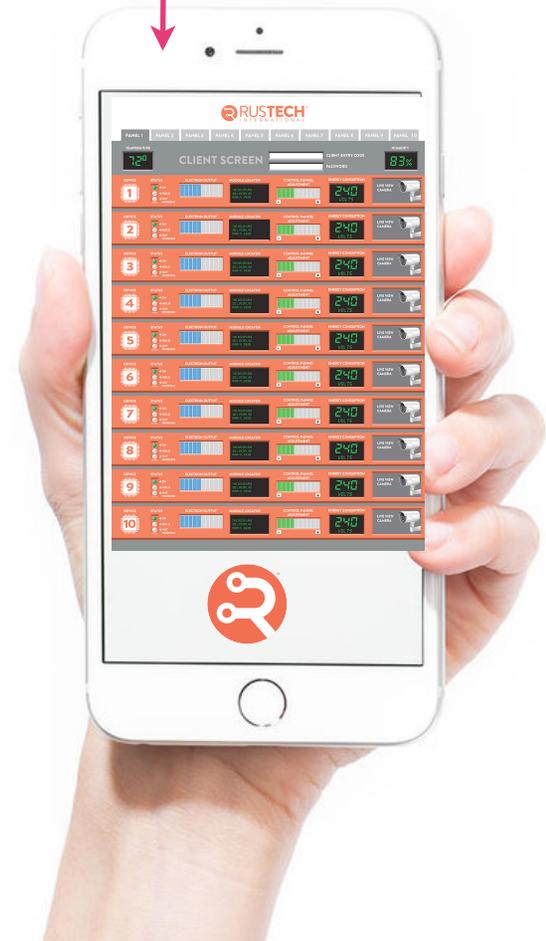

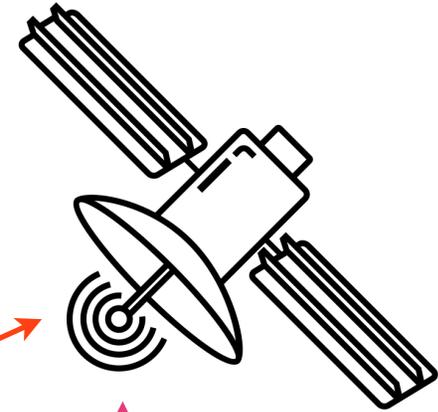

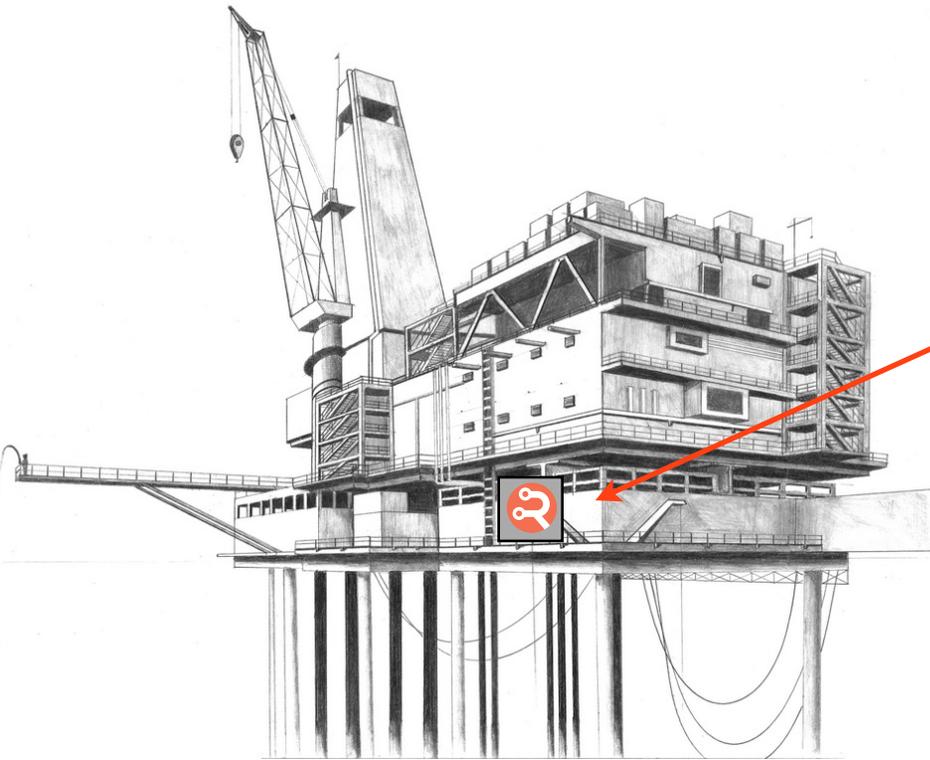

Featuring Wireless Remote Monitoring

With More Power and

More Electron Capacity

Entirely re-engineered to be the MOST ADVANCED and reliable tool in the Stop-and-Prevention of corrosion globally.

# H O W I T W O R K S

**Rustech International "smart" anticorrosion technology** will be able to communicate with the **Rustech** panel(s) from the job site anywhere in the world via GSM and GPRS (global carriers) therefore facilitating the ease of instant monitoring of the modules along with the various other functions that help diagnose the system's performance to be 100% accurate and effectively running 24/7

Sample 'screen capture' information of **Rustech's** panel and modules on various wireless devices

# INTERPRETATION OF SCREEN

Assigned Page (Module Groups per Panel)

Temperature: Measurement of Temperature 'on sight'

Humidity: Measurement of Humidity 'on sight'

Client Id and Password entry

Module Status Green: All Good -Yellow: Stand By  
Red: Not Working

Amount of Electrons flowing onto metal structure from module

Module Location Indicator

Rustech Power Adjustment Indicator (Only Rustech is able to engage with this item, not the client) Client can view the amount of power given to any one module at any given time

Volt consumption per module

Live Video Monitoring (Option to Customer)

\*\*Unlimited configurations (Client Screens) can be added when the need for more protection and additional modules would be required.

# EXTERIOR RUSTECH SMART ANTICORROSION TECHNOLOGY

## MODULES PROTECTION BOX

Protective metal box that houses all the **Rustech** modules and components.

This box will feature a window that renders a constant digital readout of all pertinent monitoring to each module, thus facilitating sight survey on location
